EPIM JQS will be the pre-qualification system for Equinor

Operators on the Norwegian Continental Shelf (NCS), Norsk Industri and EPIM <http://www.epim.no> have developed a new Joint Qualification System (JQS) to enable the pre-qualification of suppliers on the NCS.

From 1st January 2019, Equinor will use EPIM JQS for screening the market for qualified suppliers. All suppliers with delivery to Equinor involving HSE risks (including social responsibility) are required to be qualified in the EPIM JQS. Current valid verifications will be acknowledged after registration.

EPIM JQS is based on the latest digital technology with user-friendly interfaces and efficient functionalities that connect buyers and sellers of products and services.

Equinor recommend current and future potential suppliers to register in the new system. From 1st October 2018 EPIM JQS will be open for registration. EPIM will facilitate and support operators, major contractors and suppliers (all tiers) to register within the new EPIM JQS.

For information and registration, please visit www.epimjqs.no

Yours sincerely,

Peggy Krantz-Underland
Chief Procurement Officer
Equinor ASA
